

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A burglarproof device for a vehicle comprising:

a portable transmitter having a first switch ~~for transmitting which transmits~~ a preset first ID code;

~~a vehicle operational device~~ an activation determining unit for determining the activation of an operational device for the vehicle by receiving which receives the first ID code from the portable transmitter; and ~~collating~~ collates the first ID code with a prestored second ID code ~~prestored to permit the activation of the operational device for vehicle~~ a release of a locked state of a steering wheel for the vehicle on the basis of a collation result; and

an engine operation restraining unit ~~for permitting which disables~~ an engine operation based on a signal from the activation unit on the basis of the collation result by the vehicle operational device activation determining unit, or disabling the engine operation on the basis of an operating state of the engine.

2. (currently amended): The burglarproof device for a vehicle according to claim 1, wherein the portable transmitter has a second switch for transmitting a preset third ID code, in which ~~the vehicle operational device restraining activation~~ unit receives the third ID code from

the portable transmitter, and collates the third ID code with a prestored fourth ID code ~~prestored~~,  
~~and such that~~ the engine operation restraining unit disables the engine operation on the basis of  
the third ID code and the fourth ID code which are collated~~collation result~~.

3. (currently amended): The burglarproof device for a vehicle according to claim 2,  
wherein the ~~operational device for vehicle steering wheel~~ is restrained by an electromagnetic  
lock unit.

4. (currently amended): The burglarproof device for a vehicle according to claim 1,  
further comprising:

an alarming unit for ~~raising the~~ triggering an alarm by sensing a vibration of the vehicle  
when the engine operation is disabled by the engine operation restraining unit.

5. (currently amended): The burglarproof device for a vehicle according to claim 1,  
wherein the engine operation restraining unit stops the operation of the engine by shutting off  
~~the~~ an ignition of the engine or ~~the~~ a supply of a fuel to the engine.

6. (currently amended): The burglarproof device for a vehicle according to claim 1,  
wherein the engine operation restraining unit disables the operation of the engine if the engine  
transits from an operating state to a stopped state.

7. (currently amended): The burglarproof device for a vehicle according to claim 1,  
wherein the engine operation restraining unit disables the operation of the engine if the engine is  
not operated ~~even~~ after the passage of a fixed time from a permission of the engine operation.

8. (currently amended): The burglarproof device for a vehicle according to claim 1, wherein the portable transmitter includes a second switch, such that the first switch and the second switch respectively instruct the vehicle-operational-device-activation determining-unit to make a plurality of functions send a signal to release the locked state of the steering wheel and send the signal to the engine operation restraining unit to disable the engine operation.
